9/7/2010

Summary:

The “California Health Occupations Employment Projections 2008-2018” spreadsheet displays data collected from the Employment Development Department (EDD) website. The spreadsheet states the Standard Occupational Classification (SOC) code for the specific health care occupation being studied along with the title of that occupation. The EDD provides Estimated Employment for each occupation for the year 2008 and projects future employment for the year 2018. Numerical change and percent change for the 10 year projections are also stated to show the job growth that will occur. In addition, the spreadsheet further distinguishes between Annual Openings Due To Growth and the Total Annual Openings. The Annual Openings Due To Growth shows the number of new jobs that will open up in the field due to demand and growth in the field. On the other hand, Total Annual Openings takes the Annual Openings Due To Growth and adds the number of jobs that will open up due to people retiring, being fired, or leaving the field.
